

EDUCATION	Institute for Interdisciplinary Information Sciences (IIIS), Tsinghua University <i>B.E. in Computer Science and Technology</i>	Beijing, China 2024.08 - Present
	• Overall GPA: 3.8/4.0. • TOEFL iBT (2026 Band Scale): 5.0/6.0 (Equivalent to 100/120, CEFR C1) • Selected Coursework: Machine Learning (A), Deep Learning (A-), Natural Language Processing (A), Algorithm Design (A+), Operating Systems & Distributed Systems (A), Mathematics for CS & AI (A).	
PUBLICATIONS	1. An Yan, Huigen Ye, Hua Xu, Jiahao Zhang. Process-Aware LNS for Large-Scale MILP via Context-Enhanced Fine-Tuned LLM-driven Selector. Accepted to NeurIPS 2026. 2. Huigen Ye, Hua Xu, An Yan, Yaoyang Cheng. Large Language Model-driven Large Neighborhood Search for Large-Scale MILP Problems. In <i>Proceedings of the 42nd International Conference on Machine Learning (ICML 2025)</i>, Spotlight. 3. Huigen Ye, Hua Xu, An Yan. LESS: An LLM-driven Efficient Streamlining Solver for Large-Scale Mixed Integer Linear Programming Problems. <i>Artificial Intelligence (Major Revision)</i>.	
RESEARCH EXPERIENCE	Mitigating Task Interference in Sequential On-Policy Distillation <i>Research Intern, Supervised by Prof. Hao Peng, University of Illinois Urbana-Champaign</i>	2026.03 - Present
	• Study task interference in sequential on-policy distillation (OPD), identifying response-mode drift driven predominantly by MLP updates and showing that freezing MLPs suppresses collapse when transferring capabilities across tasks.	
	Applications of LLMs in Mixed Integer Linear Programming and Combinatorial Optimization <i>Research Assistant, Supervised by Prof. Hua Xu, Tsinghua University</i>	2024.06 - 2026.03
	• Scale neighborhood selection for MILP by evolving heuristic code via a dual-layer LLM agent, enabling zero-shot transfer from small training samples to ultra-large problems with 10^6 variables, generalizing to diverse combinatorial problems. • Explored RAG-augmented LLMs for tool-using and long-horizon decision-making in complex optimization pipelines, optimizing branch-and-bound via RAG-initialized code synthesis and iterative Bayesian refinement. • Develop PALL, a process-aware LNS framework for million-variable MILPs that evolves executable neighborhood operators and trains an LLM selector on hindsight oracle trajectories; implement asynchronous inference to overlap selection with sub-MIP repair.	
SELECTED AWARDS	• Scholarship for Outstanding Scientific and Technological Innovation, Tsinghua University • Champion, Huawei Algorithm Competition (University Track) • Gold Medal, 2025 Beijing Collegiate Programming Contest • Gold Medal, 10th China Collegiate Programming Contest (CCPC), Jinan Site • Gold Medal, 40th National Olympiad in Informatics (NOI), China	2025.10 2025.09 2025.04 2024.11 2023.07
SKILLS	Languages: C++, Python (Proficient); Go, Scala, Bash (Familiar). Mathematics: Probability Theory, Stochastic Processes, Abstract Algebra, Combinatorics. Tools: PyTorch, LaTeX, Git, Docker.
